

Chick Starter Checklist

- Brooder Box:** somewhere for them to live for 6 to 8 weeks- this can be a cardboard box, metal tank, plastic container, etc.
- Heat Lamp & Bulb:** required to keep your chicks warm
- Thermometer:** needed to regulate temperature in the brooder
- Bedding:** Pine shavings work very well
- Waterer:** Choose the right size and style for your flock size
- Feeder:** Choose the right size and style for your flock size
- Feed:** Start with a crumbled chick feed for the first 16 weeks.

Raising chicks take a commitment, please be sure you know what you need to do to care for them.
